PUPPY POTTY TRAINING TRACKER

USING THE TRACKER

This Puppy Potty Training Tracker is for newly adopted puppies that are on a schedule of three feedings daily.

This tracker will help multiple family members all stay on the same page. At a glance, anyone will be able to see if the puppy's been taken out. If you're flying solo, this is a super way to stay organized and focused.

DIRECTIONS

- Print one sheet per week.
- For each time you take your dog out and they eliminate, check the appropriate boxes and note the approximate time. The boxes are labeled for all of the appropriate organizational periods in your puppy's day. Take your puppy out right away after each of these periods.
- Record the number of indoor accidents in the center hexagon.

We want to see those accidents staying as close to zero as possible. If the numbers decrease, keep doing what you're doing. If they stay the same, you need to keep working and stay vigilant. If the numbers increase, you need to reexamine your program.

When your number of accidents is consistently zero, you can stop printing off trackers.

See our book, Potty Training Decoded, for greater detail on your potty training regimen!

GOOD LUCK!
